## Education

---

HCMUS - VNUHCM University of Science

2020 - 2024

Information Technology - Information Systems

## Projects

---

### Frontend Developer | Human Resource Management

Aug 2024 - Sep 2024

- **Description:** Developed a distributed system for Human Resource management. The system is designed with a microservices architecture for managing employee profiles, request, activities and rewards.
- **Responsibilities:** Design and develop responsive UI using HTML, CSS, JavaScript and integrate with Laravel, ensure seamless front-end and backend integration, optimize performance.

### Frontend Developer | Graduation Project - Famfund

Jan 2024 - Aug 2024

- **Description:** Developed a cross-platform app for mobile, web, and tablet devices to enhance family life. Key features include push notifications, chat, calendar, checklist, shopping list, and finance management. The app supports family member management, as well as package and service management. Secure transactions are facilitated through VNPay's sandbox.
- **Responsibilities:** The frontend design is created using Figma for UI/UX. The mobile application is developed with TypeScript and React Native, managed with Redux, Redux-thunk, and React Native Hooks. Expo Go is used for streamlined development and testing. The web application is built using HTML, CSS, and TypeScript, utilizing Bun and Vite as the framework for efficient web development.
